DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent No. 5,584,023 to Hsu.

As per claim 1, Hsu discloses an encryption determining section and an encryption section (col. 17, lines 4-13) and a transmission section (see fig. 4C).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 20 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hsu as applied to claim 1 above, and further in view of the examiner taking official notice.

As per claims 20 and 21, Hsu does not specifically disclose these limitations. The examiner, however, does take official notice that often it is required for a user to furnish information such as PIN, a credit card identification and an encryption/decryption key.

Art Unit: 2132

It would have been obvious to anyone having an ordinary level of skill in the art at the time the invention was made to have modified the invention of Hsu to include these features since they are necessary elements in order to unlock the secret which prevents unauthorized personnel from obtaining access to sensitive information.

Allowable Subject Matter

Claims 6-8, 10-16 are allowed.

Claims 2-5, 9, 17-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- U.S. Patent No. 5,892,826 to Brown et al.
- U.S. Patent No. 6,148,400 to Arnold.
- U.S. Patent No. 5,787,172 to Arnold.
